

# DCS MP CO-OP

## **Mission statement:**

*"Maximise fun and flight time for all members while ensuring that all members of community contribute equally to organise, make and execute DCS multiplayer events."*

## MP CO-OP Campaigns

[\*\*JOIN DISCORD SERVER NOW!\*\*](#)

## **About initiative:**

- Intention is to connect different EU based Groups
- Establish cooperation in organising joint events,
- **Ideal for smaller groups** that lean towards more complex events, but have hard time recruiting serious and dedicated members (i.e. to **consolidate fragmented DCS community**, while not interfering with their intra-group organisation)
- Share responsibility in making events between Groups to reduce overall workload on mission makers,
- Both PvE and PvP events are acceptable.

## **Establishing cooperation and communication**

- First step is to organize “hub” for sharing information between different Groups in simple way
- This will be done through Discord server created for this purpose

## **Why you should consider being part of this initiative?**

- Do you prefer events which have **strong planning** and briefing done days before flying?
- Do you find it difficult to gather enough participants that are serious enough to execute mission plans above basic “go there, kill that?”
- Do your events require higher involvement from pilots than simply joining on time?

- Would you like to link-up with similar DCS community members, share ideas, work together?
- You enjoy being member of your current Group (clan) but feel disconnected from rest of DCS community?
- You still want to keep flying with your original Group?

## **Requirements to participate**

- As a pilot you are expected to join planning meeting to ensure your place in the mission,
- As a pilot you are expected to debrief the mission,
- As a Group you are expected to contribute back to community with events and missions

**If your answers are “YES” on most questions,  
join in and bring along your friends.**

*\* If you are joining as a Group, please identify your Group Leader. Group Leaders are assigned permissions which will allow them to post information about events organised by your Group (clan)*
